

# Black and Decker BDEDMT Power Cord Replacement

Use this guide to replace the single power cord that connects from the bottom of the drill to the wall outlet to supply the drill with power.

Written By: cayla dahl

## INTRODUCTION

Before diving into the replacement of your drills power cord, it will be helpful to know that this is a fairly easy replacement with few steps and few tools. Remember to disconnect the power chord from a wall outlet before disconnecting any wires.

---

### TOOLS:

- [Tweezers](#) (1)
  - [64 Bit Driver Kit](#) (1)
-

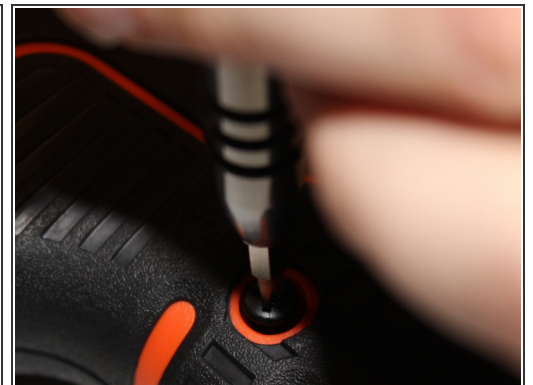

## Step 1 — Armature

⚠ Remember to disconnect the device from all external power sources.

- Detach the matrix attachment piece.
- Do this by simply pressing down on the attachment release button located at the top of the device.
- Leaving your finger pressed down on the button, simply pull on the attachment to release it.

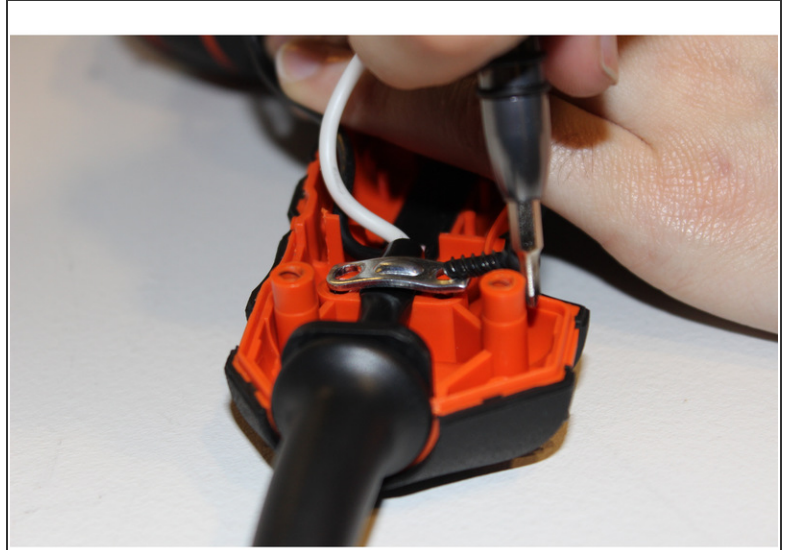

## Step 2

- Using your PH000 screwdriver with attachment J1 unscrew all seven 19mm outer screws located on the armature.
- Using the same screwdriver unscrew the single 12mm outer screw located on the armature.

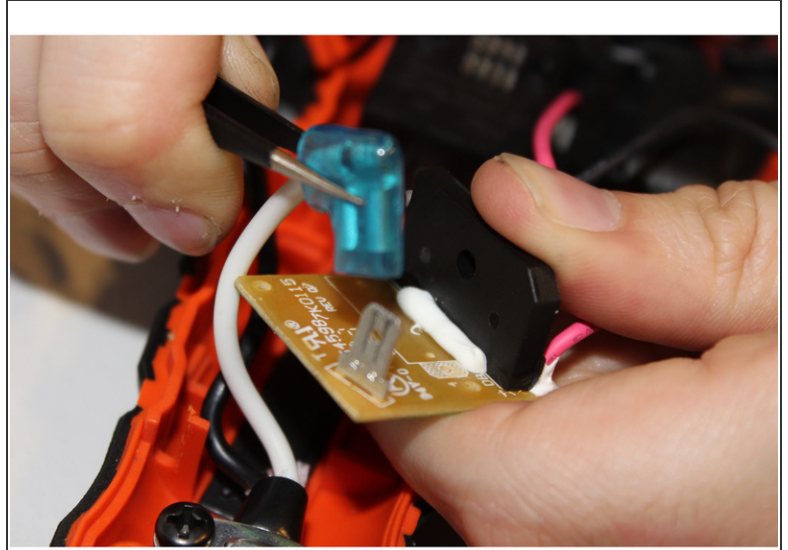

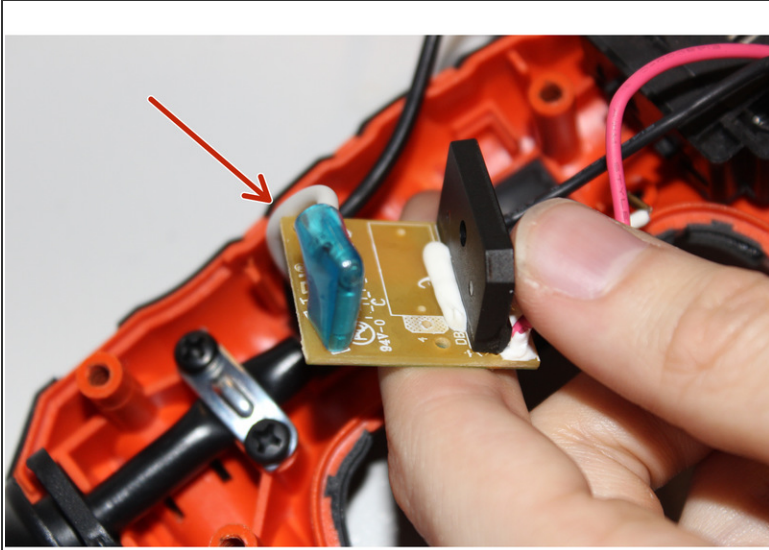

## Step 3 — Power Cord

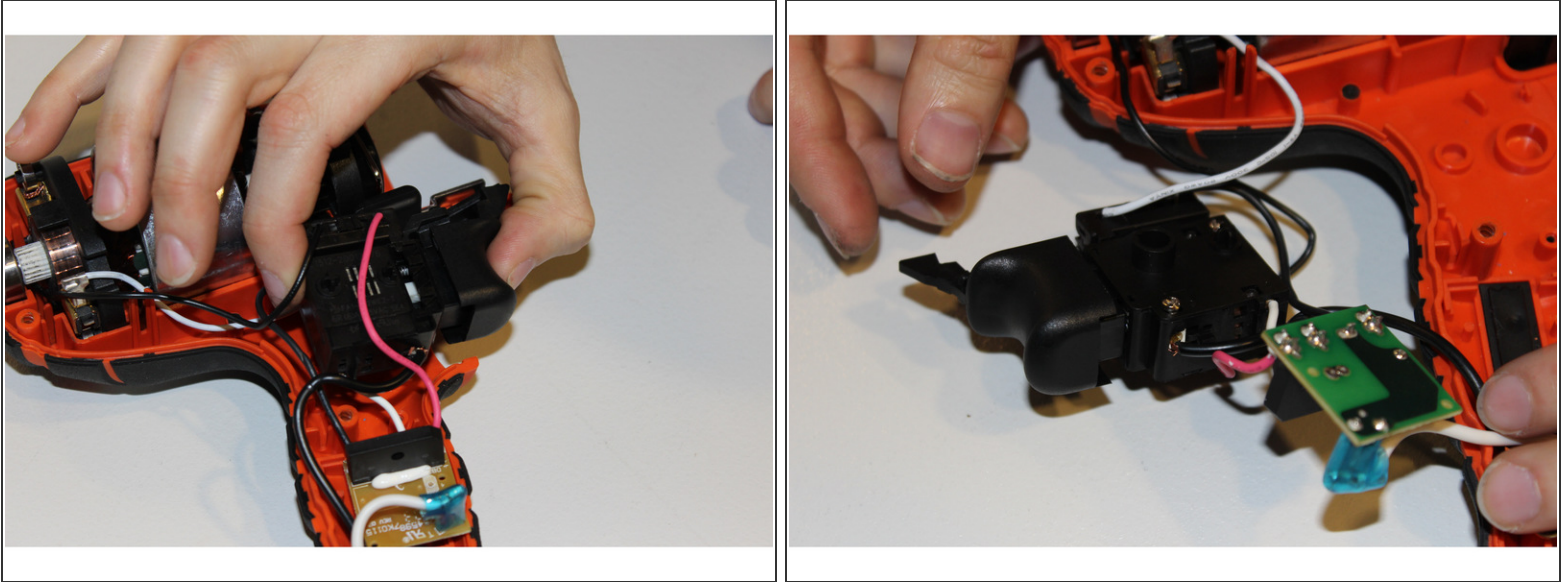

- Using the T-handle screwdriver with J1 Phillips bit you will detach the two lower black 12mm screws
- ☑ Be sure to label and organize the screws being removed on the magnetic project mat supplied by iFixit.

## Step 4

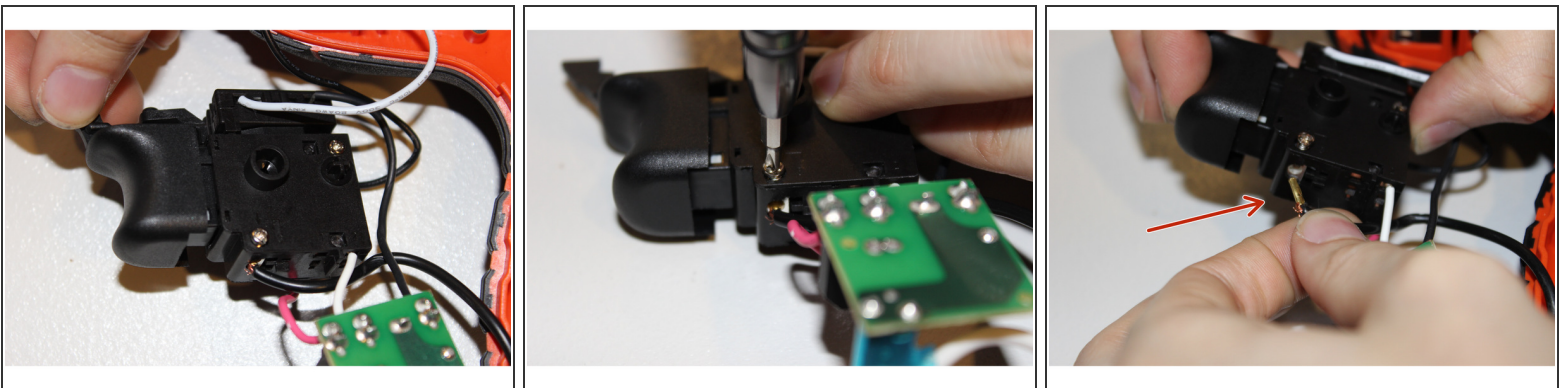

- There will be a white cord that runs from the power cord base to the circuit board located slightly above.
- Use the tweezers to detach the entire white cord and blue connection piece as a whole from the circuit board.

## Step 5

- Physically pull up on the trigger device and remove it from the armature.
- You will then flip the trigger device over onto its back.

## Step 6

- located on the bottom left of the back of the trigger device there will be a screw labeled 3 .
  - Use your PH000 screw driver with the bit labeled J0 to unscrew the screw.
  - Gently tug on the black wire to pull the wire out of the device.
-  Now the Power cord will be completely removed from the device.

To reassemble your device, follow these instructions in reverse order.
